Installation steps

1

Drawing lines on the door as the template marked, the suggested distance between handle and the floor is 1m--1.2 m.

2

Drilling holes as Template required.

3

Insert the suitable mortise into the door and use 4 pcs of M5*10 crosshead screws to fix the mortise.(ST4.2*25 self-tapping counter sunk screws for Wooden Door)

4

Insert suitable threaded sleeves, fixing rods to the corresponding position of the front panel.

5

Install suitable spindle on the spindle hole of front panel. Then thread the wire of front panel through door hole. At last, fix the front panel on the door.

6

Insert the front panel wire and mortise wire to the corresponding sockets of circuit board on back panel. Then insert the back spindle into the spindle hole of back panel and put transmission rod into mortise lock. At last, install the back panel on the door.

7

Use screws (different kinds of locks have different numbers and types of screws) to fasten back panel with back plate. At last put into 4 * 1.5V alkaline batteries and cover them.

Change direction of front handle

1

Remove screw by screwdriver(As shown).

2

Rotation upward the front handle 180°to reverse direction (As shown).

3

Tighten the screw. Please check whether the handle is used properly.

1

Remove screw by screwdriver(As shown).

If in low power or system halt, please use wire with Type-C interface to connect to portable power bank and insert in emergency power supply interface.

Attention

1.Operating the lock requires special environment. Please use it in specified field technology ranges. The long time overload and exceed usage will reduce the life length. Please keep your finger clear and prevent this product from long time in sunshine when use it.

2. After a period of time, there will has dirt on the fingerprint reader and may affect normal use. Please use soft cotton to clear the fingerprint reader. The fingerprint head and screen are the fragile glass materials, please do not hit or touch by hard object.

3. If the lock voltage is insufficient when open door, the door will prompt with alarm sound and screen showed low voltage, please change the battery. Please do not use with mixed old and new battery. If you do not change the battery on time, the system will out of power and stop running. At this time, you can buy a 9V battery from market for emergency power supply. After open door, please change to AA battery in time.

4. The lock handle is the necessary auxiliary tool to open door. Please do not hang any heavy object on the handle.

5.Please choose professional worker to install the door lock and follow with our installation standard. Please do not disassemble this lock personally and take care of relevant label to avoid unnecessary trouble for warranty.

6.Please register administrator fingerprint and keep the mechanical keys after lock is installed well. When the fingerprint and password and other methods can' t open door, you can open door by mechanical key.
